

A Resale Strategy for Historical Homes

Three data-backed hypotheses on renovation, neighborhood, and build quality.

Historical Homes

Best Neighborhoods

High Profit

Right Timing

Resold Homes Never Fall Below Grade 5

Zero of 176 resold houses fall below grade 5 — even though 28 lower-grade houses exist county-wide.

RECOMMENDATION

Set Grade 5 as Your Acquisition Floor

Below grade 5, a property has no track record of ever finding a second buyer.

Renovation Pays Off — But Not Everywhere

Renovation lifts value 12–35% for 1940–1999 homes — but costs 5% on true pre-1940 stock.

RECOMMENDATION

Renovate Mid-Century, Preserve the Historical

Modernize 1940–1999 acquisitions before listing. On true pre-1940 homes, protect the original character instead.

A Few Zip Codes Drive Most of the Resales

Just 10 of 70 zip codes account for 41% of every repeat sale in the county.

RECOMMENDATION

Source in the Most Liquid Zip Codes

98055, 98146, 98039, 98133, and 98118 resell 2–4x more often than the county average.

PUTTING IT TOGETHER

The Ideal Class of Units to Target

Grade 6+

never below the resale floor

Built 1940–1999

where renovation pays off

Liquid zip codes

98055, 98146, 98133, 98118, 98006

Renovated pre-listing

for this vintage only

One buy box: mid-century, well-built homes in proven-liquid neighborhoods, renovated before resale — true pre-1940 landmarks are a different play, held longer and left original.
